OBJECTIVE

"An individual with a keen interest in Software programs, possessing good interpersonal and analytical skills. Looking forward to earning the position of Software Engineer at a leading organization to showcase my skills in programming to generate high-end solutions to general software issues along with drawing better user experience and where I can use my skills to the advantage of the company while having the scope to develop my skills."

EXPERIENCE

Full Stack Developer Intern

Kubotor Pvt Ltd

📅 July 2024 – Jan 2025

📍 Remote

- Designed and developed responsive web pages using HTML, CSS, and JavaScript to enhance user experience.
 - Built and maintained backend servers using Node.js to handle application logic and APIs.
 - Implemented MongoDB for efficient database management and seamless data storage solutions.
 - Created and integrated RESTful APIs to enable smooth communication between the frontend and backend systems.
 - Debugged, tested, and optimized web applications to improve performance and reliability.
- (View Website)

Full Stack with MERN Course

Croma Campus

📅 August 2023 – August 2024

📍 Sector 3, Noida

- Completed an intensive course in Full Stack Development with MERN (MongoDB, Express.js, React.js, Node.js).
- Gained hands-on experience in frontend development using HTML, CSS, JavaScript, and jQuery.
- Learned advanced JavaScript concepts and applied them in building interactive web applications.
- Developed and deployed RESTful APIs using Node.js and Express.js.
- Worked with MongoDB for database management, optimizing queries and data storage solutions.
- Built several projects and applications demonstrating skills in both frontend and backend development.

PROJECTS

Portfolio Website

Personal Project

Developed a personal portfolio website using HTML, CSS, and JavaScript. The website showcases my projects, technical skills, and professional accomplishments. It features a clean, responsive design with interactive animations, a user-friendly navigation system, a project gallery, an about section, and a contact form. Ensured the site delivers a visually appealing and functional user experience across all devices.

SMART DOOR BELL

AI Doorbell

Developed a sophisticated Facial Recognition Access Control System using Python to ensure secure entry to restricted areas. The system leverages advanced machine learning algorithms to accurately identify authorized personnel and grant them access while denying entry to unauthorized individuals. Utilized OpenCV and dlib libraries for real-time facial detection and recognition, integrating them with a secure database for storing and managing facial data. This project enhances security by providing an efficient and reliable method of access control based on biometric authentication.

JARVIS ASSISTANT

Voice-Controlled AI

Developed a desktop voice assistant in Python to automate a variety of tasks, including web browsing, fetching Wikipedia summaries, playing YouTube videos, and executing real-time commands. Integrated key libraries like SpeechRecognition for speech-to-text, pyttsx3 for text-to-speech, and pyautogui for automating mouse and keyboard input. The voice assistant was designed to enhance productivity by allowing users to perform actions hands-free, thus improving efficiency in daily tasks and workflows.

EDUCATION

B.Tech (CSE)

📅 2019-2023

Guru Jambheshwar University of Science and Technology, Hisar

Senior secondary

📅 2018-2019

Campus School,Hisar

Secondary

📅 2016-2017

Campus School,Hisar

CERTIFICATES
